

# Secure<sup>TM</sup> EVA TPN Container

## The Clear Choice

### Superior Strength

The Secure EVA container provides superior strength, especially when refrigerated, making it ideal for use when commercial shipping is necessary.

### Environmentally Safe

The Secure EVA container is ecologically friendly and is safer for the environment after disposal.

### Superior Stability

The Secure EVA container has no plasticizers that can leach into admixtures and offers superior stability and compatibility.

### Superior Clarity

The Secure EVA material provides a container with superior clarity that allows for easy inspection of admixtures.

# SECURE™ EVA

## Durable

The Secure EVA container is designed for extra durability, particularly in cold storage.

*Your Benefit*—Decreased risk of solution loss due to dropped boxes and rough handling by commercial shippers.

## Versatile

The Secure EVA container is available with compounder or gravity-fill legs.

*Your Benefit*—Maximum versatility with minimum inventory.

## Safe

The Secure EVA containers are made with Ethyl Vinyl Acetate (EVA) and are LATEX FREE

*Your Benefit*—The material for the bag body is not PVC and has no plasticizers that can leach into the IV solutions and is safe for use with latex sensitive patients.
